

# FLL JUDGING QUESTIONS

Below are some common questions asked by FLL judges. Before you go to your first competition, practice these questions with your team. Being prepared is a huge factor of a successful season.

Good luck!

-- *The Ponytail Posse*

## - TECHNICAL JUDGING -

As you run your missions for the judges, talk through it. Explain what the robot is doing - focus on sensors and landmarks.

- ❖ Did you use any sensors?
- ❖ What were some ideas that you had which didn't work?
- ❖ What do you think is the coolest thing about your robot?

## - PROJECT JUDGING -

Be sure to include some of this information in your presentation so the judges don't have to ask.

- ❖ What are your research sources?
- ❖ Who did you share your solution with?
- ❖ How did you come up with your solution?
- ❖ Did you have any other ideas for your solution? If so, why did you pick this one?
- ❖ How much would this cost?
- ❖ What is your target audience?

## - CORE VALUES JUDGING -

If your team did any outreach (helping other teams, demos, etc.), be sure to talk about it here.

- ❖ What is gracious professionalism? Coopertition?
- ❖ What is a core value and how did you show it?
  - Talk about **gracious professionalism** and **coopertition** before anything else!
- ❖ What was a conflict within your team and how did you solve it?
- ❖ How did you split up the work?
- ❖ If you could go back and change something from your season, what would it be?
- ❖ Tell me something you learned about the person next to you. (usually goes down the line & includes every member)
- ❖ What does FIRST stand for?
- ❖ How has Lego League helped you in life?
- ❖ What advice would you give to your coaches/mentors?
